The Great Wall of China The Mongols were nomadic people who lived north of China. Mongol raids into China caused a great deal of destruction during the Age of Warring States. In 214BrE, when Shih Haung-ti unified China and began the Ch'in Dynasty, he decided to end the Mongol threat by constructing one of the largest public works projects in history. To this day, the Great Wall of China is the longest human-made structure on earth. More than a million Chinese workers connected a number of existing defensive walls into a single system fortified by watchtowers in order to keep out the Mongols. Very little remains of the original construction, but later rulers made the wall stronger and longer. Today the Great Wall of China stretches more than 1,500 miles. The wall is generally twenty-five feet high with forty-foot towers. It is wide enough for wagons to pass each other in opposite directions. If a 1,500 mile wall began in Miami, Florida, it might end in Boston, Fill in the Blanks When Shing Haung-ti became the First *E_p_r_r of China in 214BrE, he decided the best way to *u_i y his the C_i_e_e people was to keep the n_m_d_c tribes from the north from a structure on earth. Answer in complete sentences *1. Approximately how old is the Great Wall of China became centers of trade.	Name:	CHINESE HISTORY
The Great Wall of China The Mongols were nomadic people who lived north of China. Mongol raids into China caused a great deal of destruction during the Age of Warring States. In 214BCE, when Shih Haung-ti unified China and began the Ch'in Dynasty, he decided to end the Mongol threat by constructing one of the largest public works projects in history. Answer in complete sentences *1. Approximately how old is the Great Wall of China?	The Mongols were nomadic people who lived north of China. Mongol raids into China caused a great deal of destruction during the Age of Warring States. In 214BCE, when Shih Haung-ti unified China and began the Ch'in Dynasty, he decided to end the Mongol threat by constructing one of the largest public works projects in history. To this day, the Great Wall of China is the longest human-made structure on earth. More than a million Chinese workers connected a number of existing defensive walls into a single system fortified by watchtowers in order to keep out the Mongols. Very little remains of the original construction, but later rulers made the wall stronger and longer. Today the Great Wall of China stretches more than 1,500 miles. The wall is generally twenty-five feet high with forty-foot towers. It is wide enough for wagons to pass each other in opposite directions. If a 1,500 mile wall began in Miami,	Massachusetts, Des Moines, Iowa, Oklahoma City, Oklahoma, or San Antonio, Texas. Gates through the wall became centers of trade and contact with the northern nomads. Ironically, the Song Dynasty fell to Mongol invaders from northeast China when a traitor opened a gate in the wall. Many people believe that the Great Wall of China can be seen from the moon without a telescope, in fact, a question in the game Trivial Pursuit says as much. Astronaut Alan Bean has been on the moon, and said otherwise. "The only thing you can see from the moon is a beautiful sphere, mostly white (clouds), some blue (ocean), patches of yellow (deserts), and every once in a while some green vegetation. No man-made object is visible on this scale. In fact, when first leaving earth's orbit and only a few thousand miles away, no man-made object is visible at that point either." Quoted in More Misinformation (1980) Malcolm
When Shing Haung-ti became the First *Epr_r of China in 214BCE, he decided the best way to *uiy his the Ciee people was to keep the nmdc tribes from the north from *atc_ig his empire. He cnetd a series of existing dfnie walls to create what became known as the GW Today, the GW of Ccovers a distance of more than miles. It is the largest m m structure on earth. Answer in complete sentences *1. Approximately how old is the Great Wall of China?	_	Rlanke
